

Facility Access Solutions with the GDS3710

Our GDS3710 HD IP Video Door System allows you to protect, manage and track access to any facility, and makes this easier than ever before. Integrate the GDS3710 with your communication and/or security solution to fully manage access to any business, apartment, hotel, or commercial facility. Use our GXV series of IP Video Phones and GXP series of IP Phones to view live video or audio feeds and let visitors in, record all comings and goings through your IP network using our GVR series of Network Video Recorders, and use our UCM series of IP PBXs, which supports video, to anchor the entire communication platform.

General Use Case Scenario

See Everything

The GDS3710 features a built-in hemispheric camera which allows for 180 degree, wall-to-wall video coverage. This ensures that you can clearly see anything and everything that comes near the GDS3710.

Easily Manage and Track Access

The GDS supports use of RFID cards and chips, making it ideal for offices, commercial facilities, warehouses, stores, apartments, hotels, dorms and more. You can also allow access to a facility through use of PIN codes.

Enhance Your Security System

The GDS3710 can be integrated with your existing security devices or ones that you may add in the future. By offering alarm in and alarm out ports, you can integrate

GDS Manager: Your Office Management Tool

GDS Manager, the free software available for use with the GDS3710, offers a complete office and human resources management platform. Track employee check-in and check-out times, view video and data from multiple GDS' and more.

Integrate Your Communications Platform with the GDS3710

GXP2100 series - Receive an image screenshot from GDS3710, have a voice conversation, open the door via softkey
GXP1700 & GXP1600 series - receive a voice call from GDS3710, have a voice conversation, open the door via softkey

Our GXV series of IP Video Phones for Android and Grandstream Wave Softphone App allow you to see live video feeds and have a conversation with a visitor and let them in by tapping a button on the phones screen.

Our GVR series of NVRs offers the ideal, dedicated device for recording and managing all GDS3710 feeds while also offering live views of all video feeds. The GDS3710 is also compatible with any ONVIF compliant NVR.
